

T&L Schools

There are two nutrient management training schools. The Soil Science, Soil Fertility, Turf Production School is a lecture series by Virginia Tech professors and DCR staff members. Based on the topics covered, it could be characterized as a mini-agronomy class. This school will be offered again in Summer 2019.

The Nutrient Management Plan Writing School for Turf & Landscape covers writing nutrient management plans using Virginia's criteria. This is a hands-on session in which participants complete exercises using case-study information from a golf course, an athletic field, etc. to write the various components of a nutrient management plan.

Both schools are fast-paced; some turf and landscape background will help participants better understand the material. However, no pre-requisites are required to attend these schools. Participants may choose to attend either or both schools depending on their ability to meet the education requirement for certification. Space is limited; registration is first-come, first-served.

Registration form with payment must be received by December 3, 2018 to avoid \$25 late fee per session. All fees and registration must be received before the first day of the training school.

Fees are nonrefundable.

For more registration information, contact Susan Jones at (804) 443-3803, email susan.jones@dcr.virginia.gov.

Nutrient Management Plan Writing School for Turf & Landscape

8:30 a.m.-4:45 p.m. each day
